

Text, Video, and Voice-Response Research

inVibe is the first-ever, all-in-one research platform that uses digital health technology to deliver crucial consumer data you need, right when you need it. inVibe delivers accurate and affordable quantitative and qualitative insights from targeted **patients and healthcare professionals** in under 24 hours.

Crucial Insights Delivered at the Speed of Sound

Traditional market research is vital, but slow and complex. inVibe applies the agility and power of digital health to deliver crucial audience insights in less than 24 hours.

Using the latest targeting and mobile technologies, inVibe helps companies collect traditional survey responses as well as text, pictures, and dramatic audio recordings revealing emotional and cognitive reactions to your stimuli. inVibe has virtually unlimited research applications, including:

- Ad concept testing
- Ethnographic immersion
- Customer attitude & behavior studies
- Brand equity surveys
- Market profiling/segmentation analysis

Online portal enables clients to download all study data and review audio and video responses in a multimedia player.

Join the dozens of healthcare companies already taking the pulse of their audiences with the innovative power of inVibe
